

PRANAV REDDY GADDAM

San Jose, CA | +1 (925) 605-9293 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | reddy.pranav.gaddam@gmail.com

PROFILE

Full-stack Software Engineer specializing in agentic AI systems, LLM-powered applications, and real-time infrastructure. Experienced in prompt engineering, tool-call orchestration, and deploying production-grade Agentforce-aligned solutions using React, TypeScript, FastAPI, and PyTorch.

SKILLS AND CERTIFICATIONS:

- Languages:** Python, JavaScript, TypeScript, HTML, CSS, SQL
- Tools:** Docker, Kubernetes, MongoDB, PostgreSQL, Git, Jest, pytest, Jenkins, Cursor, Claude Code, Codex
- Technologies/Frameworks:** React.js, Next.js, FastAPI, Responsive Design, AWS, GraphQL, REST APIs, Apex, Agentforce
- Concepts:** OOP, Prompt Engineering, Agent Architecture, Real-Time Infrastructure, LLM Fine-Tuning
- Achievements:** 3x Hackathon Winner (Cisco, AWS, SJSU)
- Certifications:** AWS Certified Cloud Practitioner, 4x Claude Certifications (Claude 101, AI Fluency)

EXPERIENCE

Software Engineer (Data) | VE Projects Pvt Ltd

Aug 2023 – Jul 2024

- Developed and maintained backend services using Python and FastAPI with PostgreSQL, handling **500K+** daily API requests with **99.5%** uptime through comprehensive testing (pytest, **85%** coverage) and on-call incident resolution.
- Collaborated with cross-functional teams to build and optimize RESTful APIs and microservices, reducing response latency by **35%** through database query optimization, caching strategies, and data structure improvements.
- Participated in code reviews and agile workflows, shipping features across **10+** production deployments while maintaining code quality through CI/CD pipelines (Jenkins, Docker).

PROJECTS

Advanced Explainable AI Toolkit | [Link](#)

Aug 2025 – May 2026

- Implemented token confidence, attention heatmaps, logit lens, and gradient attribution to enable real-time visualization of internal agent reasoning patterns across math-specialized models.
- Architected a distributed inference pipeline with a FastAPI async backend and **React + TypeScript** frontend, achieving sub-second explainability latency (**<1.1s** logit lens, **0.52s** gradient attribution) for interactive model introspection.
- Integrated **TurboQuant** KV cache compression to enable local inference of **7B** parameter models on consumer hardware, reducing memory footprint by **4x** while maintaining output quality for long-context reasoning tasks.

GitBridge: GitHub Repos into Diagrams, Podcasts, and Conversations | [Link](#)

Jul 2025 – Aug 2025

- Engineered an agentic AI platform processing 3GB+ repositories, architecting tool-call pipelines and prompt chains for diagram generation in **<6s** using Mermaid.js and podcast creation in **<3 minutes** via ElevenLabs.
- Designed conversational agent intelligence using Qwen-32B LLM with **sub-200ms** response latency, enabling real-time developer interactions via agentic reasoning flows across complex codebases.
- Deployed a full-stack real-time infrastructure using FastAPI and Vite.js + TailwindCSS on AWS EC2 via Docker, supporting concurrent repository processing at scale.

Hirely: AI-Powered Interview Analysis Platform | [Link](#)

Oct 2025 – Nov 2025

- Built a real-time interview analysis engine using 8+ Computer Vision models at **30 FPS**, computing **50+** behavioral metrics with **95%+** accuracy to deliver actionable candidate insights.
- Designed agent intelligence layer integrating Claude, Groq, Deepgram, and ChromaDB, engineering prompt chains and reasoning flows to deliver role-specific questions, cutting interview prep time by **60%**.
- Delivered a production-ready FastAPI + React platform (**20+** endpoints, WebSockets, Supabase, S3) processing **1,800+** frames/min with automated coaching report generation.

EDUCATION

San Jose State University | M.S., Applied Data Science | **CGPA 3.8/4.0**

Aug 2024 - May 2026

- Coursework:** Big Data, Machine Learning, Data Warehouse & Pipeline, Distributed Systems

St. Martin's Engineering College | B. Tech in Computer Science and Engineering

Aug 2019 - May 2023

- Coursework:** Database Management Systems, Distributed Systems, Data Structures and Algorithms

LEADERSHIP AND INVOLVEMENT

Director (IT), Indian Student Organization SJSU

Aug 2025 – May 2026

- Designed and deployed a scalable ticketing and payment system handling **2,500+** attendees with automated QR-based check-ins, contributing **\$30,000+** in revenue.

Director, Technology Awareness Month SMEC

Sep 2021 – May 2023

- Led the month-long initiative, organizing workshops, tech talks, and hands-on sessions that introduced students to emerging technologies and global industry trends, driving large-scale engagement across the institution for **700+** students.
